

HIGHTEC DIESEL FLOW FIT

Optimal additive to enhance flowability.

Description

HIGHTEC DIESEL FLOW FIT is a highly effective combination of agents to live up to the expectations of the latest additive and fuel technologies. HIGHTEC DIESEL FLOW FIT is suitable for all diesel injection systems.

Application

One dose of HIGHTEC DIESEL FLOW FIT is sufficient for tank contents with 75 litres of diesel fuel. Do not empty the tank completely before filling. HIGHTEC DIESEL FLOW FIT is compatible with other commercially available diesel additives and the relevant construction materials.

Benefits

- Improvement in the properties of middle distillates
- Improvement in the properties of light heating oil
- Effective lowering of the pour point for diesel fuels and heating oil
- Optimised filterability for diesel fuels and heating oil
- Controlled formation of paraffin wax crystals
- Suitable for summer and winter diesel fuel

Notices

Not suitable for gasoline vehicles.

Dosing

- Add a dose to the tank contents (sufficient for a tank capacity of approximately 75 litres). Do not empty the tank contents completely.
